

Original BMW Accessories.

Installation Instructions.

USB/Audio Interface Retrofit BMW 5 Series (E60, E61)

These installation instructions apply to cars from 03/07 only.

Retrofit kit No. 65 41 0 444 936 USB/audio interface retrofit kit

Installation time

The installation time is **approx. 2.5 hours**. The installation time will increase by **approx. 0.40 hours** for cars without SA 644. This may vary depending on the condition of the car and the equipment in it.

Important information

These installation instructions are primarily designed for use within the BMW dealership organisation and by authorised BMW service companies.

In any event, the target group for these installation instructions is specialist personnel trained on BMW cars with the appropriate specialist knowledge.

All work must be completed using the latest BMW repair manuals, circuit diagrams, servicing manuals and work instructions, in a rational order, using the prescribed tools (special tools) and observing current health and safety regulations.

If you experience installation or function problems, limit troubleshooting to approx. 0.5 hours for mechanical or 1.0 hour for electrical work.

In order to reduce costs and avoid any additional expense, send a query immediately to the Technical Parts Support via the Aftersales Assistance Portal (ASAP).

Specify the following information:

- Chassis number,
- Part number of the retrofit kit,
- A precise description of the problem,
- Work steps already carried out.

Do not archive the hard copy of these installation instructions since daily updates are made by ASAP!

Pictograms

Denotes instructions that draw your attention to dangers.

Denotes instructions that draw your attention to special features.

◀ Denotes the end of the instruction or other text.

Installation information

In cars with SA 620 without SA 609, the High charger/hands-free electronic control unit **E** is already fitted, it is only necessary to fit USB retrofit cable **A**.

On cars with AUX-IN sockets installed ex works, this remains in the car.

Ensure that the cables and/or lines are not kinked or damaged as you install them in the car. The costs thereby incurred will not be reimbursed by BMW AG.

Additional cables/lines that you install must be secured with cable ties.

If the specified PIN chambers are occupied, bridges, double crimps or twin-lead terminals must be used.

When routing fibre optic cables, make sure the bending radius is no less than 25 mm.

Refer to the instructions for handling fibre optic cables acc. to ISTA no. 61 00

Ordering instructions

The High electronic charger/hands-free module **E** is not included in the retrofit kit and must be ordered separately (see EPC for part number and further details).

List of special equipment

The following special equipment must be taken into consideration when installing the retrofit kit:

- SA 609** Professional navigation system
- SA 620** Voice input system
- SA 644** Mobile phone preparation with Bluetooth interface

Special tools required

00 9 310, installation wedges

Legend

- A** USB retrofit cable
- B** Power supply retrofit cable
- C** Adapter cable (cars with SA 644 only)
- D** USB/AUX-IN jack
- E** High charger/hands-free electronic control unit (not supplied in the retrofit kit)
- F** Cable tie (10x)
- G** Socket casing 4-pin black (cars without SA 644 only)
- H** Socket casing 10-pin black (cars with SA 644 only)
- I** USB/AUX-IN socket (is not required)
- J** USB/AUX-IN socket holder
- K** Hexagonal nut M5 x 14 (3x, not required)
- L** Hexagonal nut M5 (4x, not required)
- M** High charger/hands-free electronic control unit holder (not required)

2. Preparatory work

	ISTA no.
Conduct a brief test	---
Disconnect negative pole of battery	12 00...
The following components must be removed first of all	
Luggage compartment floor trim	51 47 101
Wheel arch trim in luggage compartment on left	51 47 151
Backrest side section on the rear seat, left	52 26 008
Rear left door sill strip	51 47 030
Rear seat	52 24 005
Centre console	51 16 200
Oddments box ventilation nozzle (no longer required)	51 16 ...
In addition for cars with SA 644	
Remove Low charger/hands-free electronic control unit with holder (no longer required)	84 21 535
In addition for cars without SA 644	
M-ASK or CCC	65 83 010

6. Installation and cabling diagram

Cars with SA 644 only

060 1358 Z

Cars without SA 644 only

060 1357 Z

Legend

- A** USB retrofit cable
- B** Power supply retrofit cable
- C** Adapter cable
- D** USB/AUX-IN jack
- E** High charger/hands-free electronic module

- 1** M-ASK/CCC
- 2** Installation point for Low charger/hands-free electronic module

7. To install and connect the power supply retrofit cable (cars without SA 644 only)

Route branch **B1-B5** to the installation point of the CCC/M-ASK (1).

Route branch **B6-B8** to the installation point of the High charger/hands-free electronic module **E** in the spare wheel well.

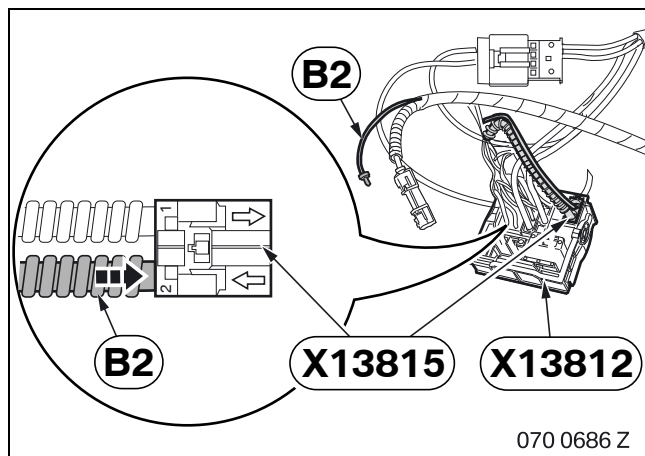

Disconnect the cable (1) from plug **X13812** (black 16-pin) and connect to socket casing **G** as follows:

- Red cable from PIN 15 to socket casing **G**, PIN 1
- Brown cable from PIN 12 to socket casing **G**, PIN 2

Connect branches **B3** and **B4** to plug **X13812** as follows:

- Branch **B3**, brown cable, to PIN 12
- Branch **B4**, RT cable, to PIN 15

Connect branch **B5** to socket casing **G**.

Unclip fibre optic cable casing **X13815** (SW 2-pin) from plug **X13812** (SW 16-pin).

Disconnect the outgoing fibre optic cable from fibre optic cable casing **X13815** PIN 2 and connect branch **B2**, OR cable.

Clip fibre optic cable casing **X13815** into plug **X13812**.

7. To install and connect the power supply retrofit cable
(cars without SA 644 only)

Release the fibre optic cable connector (1) of branch **B1** and connect the previously disconnected fibre optic cable (2).

Connect plug **X13812** (black 16-pin).

8. Route the USB retrofit cable

Clip the USB/AUX-IN socket holder **J** to the location of the previously-removed ventilation nozzle in the oddments box of the centre console (1).

Clip the USB/AUX-IN socket **D** into the USB/AUX-IN socket holder **J**.

 Tie back the standard AUX-IN socket plug as it is no longer required. ◀

Route branches **A1** (HSD socket casing) and **A2** (4-pin SW socket casing), to the USB/AUX-IN socket installation point **D** and connect.

Install the centre console.

Route branches **A3** (black 54-pin socket casing) and **A4** (HSD socket casing) to the installation point of the High charger/hands-free electronic module **E** in the spare wheel well.

Route branches **A3** (black 54-pin socket casing) and **A4** (HSD socket casing) into the oddments box (1).

Secure retrofit cable **A** with cable tie **F**.

9. To connect the High charger/hands-free electronic module

▶ On cars with **SA 620** and without **SA 609**, the High charger/hands-free electronic module is already installed. ◀

Cars without SA 644 only

Connect branches **B6** and **B7** to branch **V3** (54-pin BL) as follows:

- Branch **B6**, (brown cable), to PIN 36
- Branch **B7**, (RT cable), to PIN 17

Connect branches **A3**, **A4** and **B8** to High charger/hands-free electronic module **E** and push the High charger/hands-free control module into the oddments box (1).

Cars with SA 644 only

Route adapter cable **C** to the luggage compartment.

Route branches **C1** and **C11-C13** to the installation point of the Low charger/hands-free electronic module (1) on the left-hand wheel arch.

Route branch **C2-C10** to the installation point of the High charger/hands-free electronic module **E** in the spare wheel well.

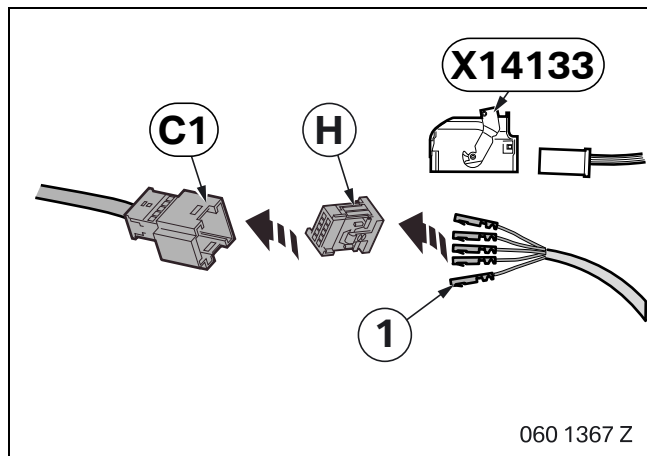

Connect branches **C2-C8** to branch **A3** (54-pin BL) as follows:

- Branch **C2**, WS cable, to PIN 1
- Branch **C3**, BRWS cable, to PIN 19
- Branch **C4**, shield, to PIN 21
- Branch **C5**, BRWS cable, to PIN 11
- Branch **C6**, GN cable, to PIN 32
- Branch **C7**, RT cable, to PIN 17
- Branch **C8**, BR cable, to PIN 36

Connect branch **C9** (Fakra socket casing) and branch **C10** (fibre-optic cable plug casing, 2-pin black) to the High charger/hands-free electronic module **E**.

Connect branch **A4** (HSD socket casing) to High charger/hands-free electronic module **E**.

9. To connect the High charger/hands-free electronic module

Disconnect the following cables (1) from plug **X14133** 54-pin WS and connect to socket casing **H**.

- RT cable from PIN 17 to PIN 6
- BR cable from PIN 36 to PIN 7
- BL cable from PIN 11 to PIN 5
- GN cable from PIN 32 to PIN 4
- Screen cable from PIN 21 to PIN 3
- WS cable from PIN 1 to PIN 2
- GE cable from PIN 19 to PIN 1

Connect socket casing **H** to branch **C1**.

Connect the standard Fakra socket casing **X14081** to branch **C13** (Fakra plug casing SW).

Release the fibre-optic cable connector on branches **C11** and **C12**.

Remove the outgoing fibre-optic cable (2) from plug **X14134** PIN 2 and connect to branch **C12** (fibre-optic cable connector, OR).

Remove the incoming fibre-optic cable (1) from plug **X14134** PIN 1 and connect to branch **C11** (fibre-optic cable connector, GN).

Cars with SA 620 without SA 609 only

Connect the cable from branch **A3** to the same pin configuration of plug **X17397** (54-pin BL) and connect to the High charger/hands-free electronic module.

Connect branch **A4** (HSD socket casing) to High charger/hands-free electronic module (1).

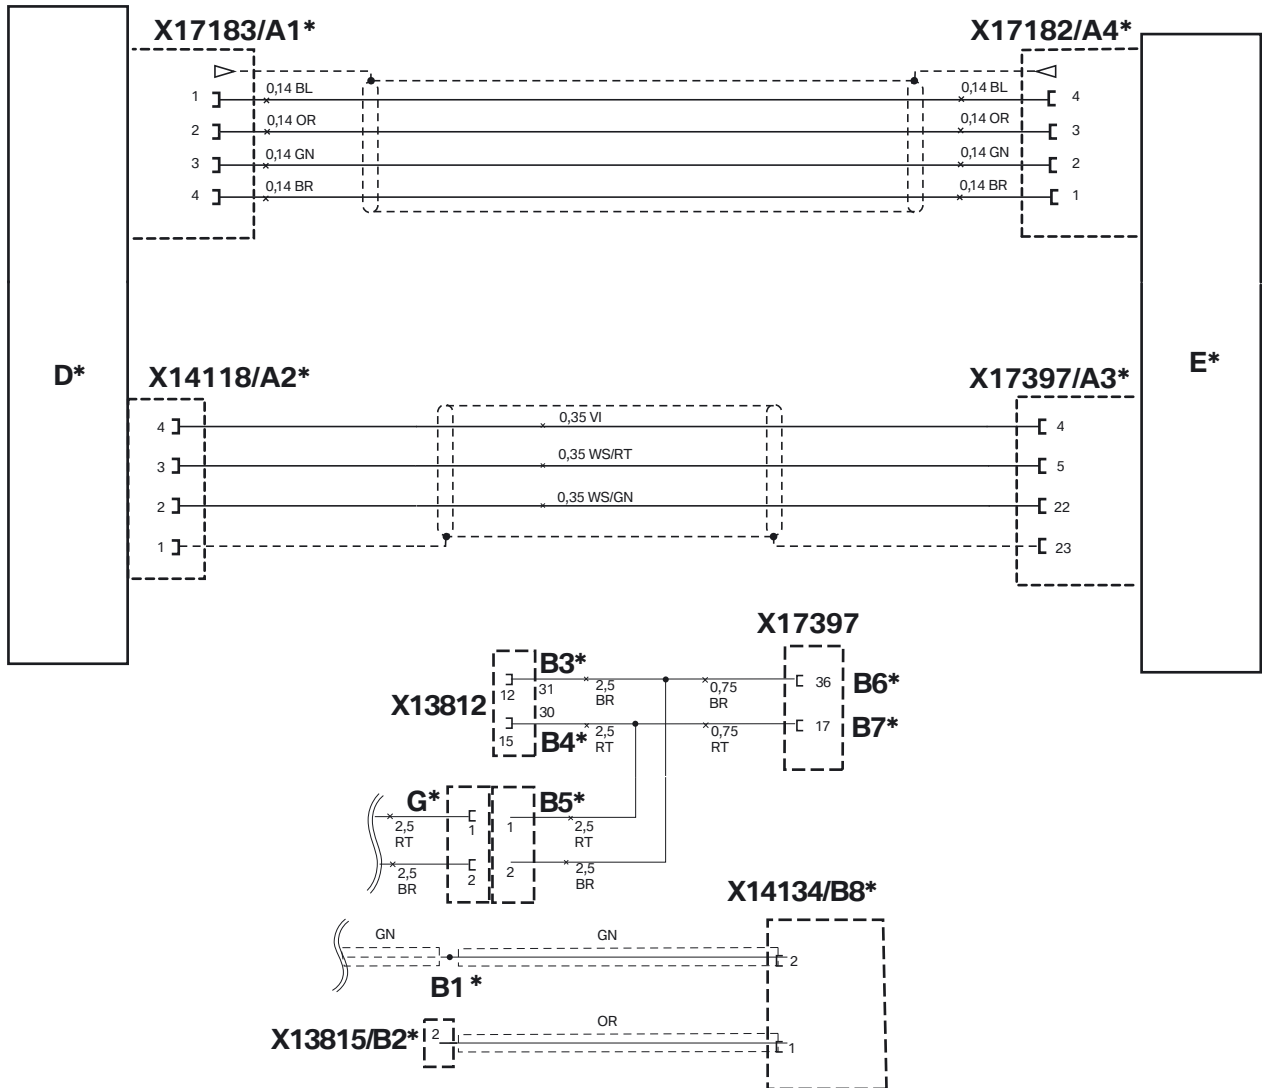

The BL cover cap of branch **A3** is no longer required.

10. Concluding work and coding

This retrofit system requires coding.

- Connect the battery
- Encode the retrofit with SSS (software service station) via the **CIP** path
- Conduct a brief test
- Re-assemble the car
