

E60 - MOST port

Installation location

The MOST port is located in the glove compartment.

Note: The installation location depends on the model series concerned

On other model series (e.g. E65, E63), the MOST port is on the rear of the glove compartment.

Key	Explanation	Key	Explanation
1	Sealing cap	2	Left-hand glove compartment bracket
3	Glove compartment	4	Protective cap for MOST port
5	MOST port		

Construction

The MOST port is sealed with a cover. The cover also serves as a protective cap for the MOST port.

How it works

For access, the glove compartment must be opened and unclipped on the left and right-hand sides.

Then unclip the protective cap and pull it off of the MOST port.

After programming, clip the protective cap in to seal the MOST again.

After performing repairs in the front-passenger footwell (e.g. control unit replacement), care must be taken to ensure that the MOST port is installed correctly.
