

The brackets for the ISOFIX child seat mountings are located behind the caps as shown. Before fitting the ISOFIX child seat, remove the caps and pull the belt away from the area around the child seat mountings.

Touring: rear seats

When driving with children

 If your car has rear side airbags, do not allow children travelling in child seats to lean out towards the door trim, as serious injuries could occur if the side airbags were to be triggered. ◀

You can have the side airbags at the rear disabled. BMW Service will be pleased to advise you on this.

Child safety catches in rear doors
