

**E60, E61, E63, E64, E87 -
M-ASK motherboard and processor board**

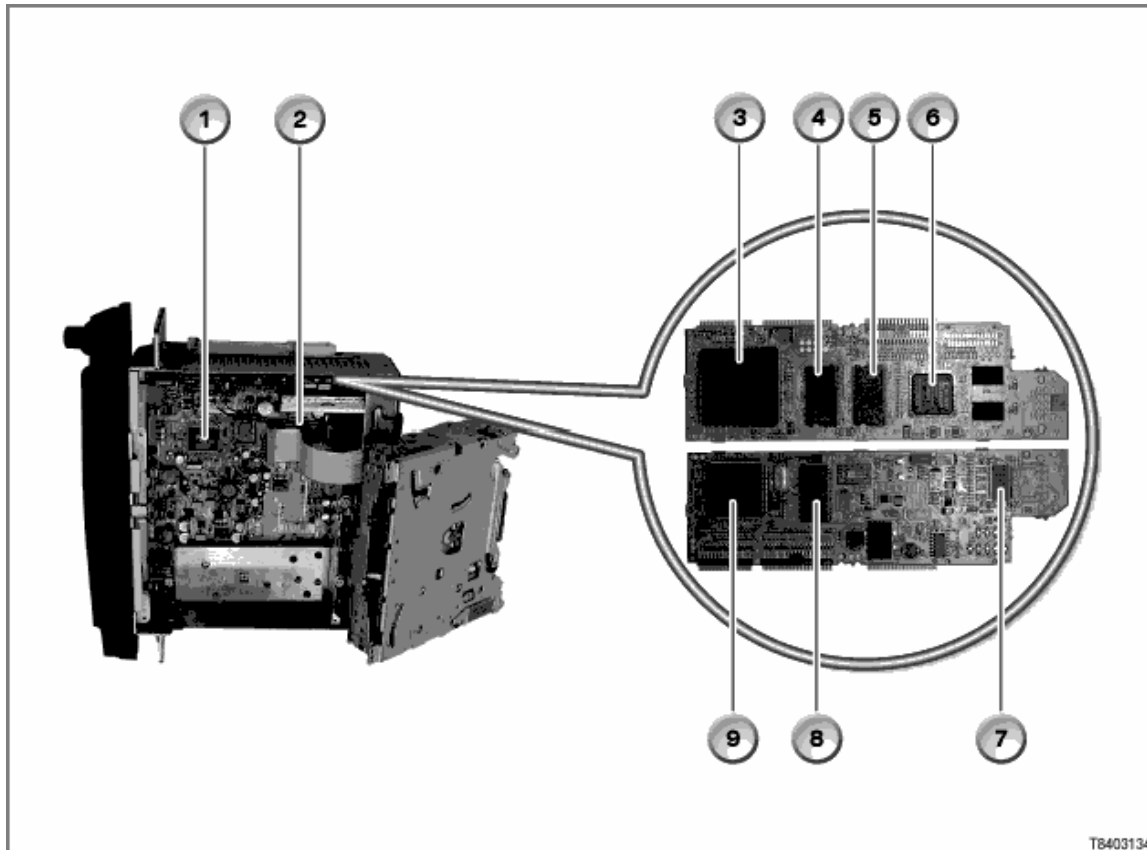

Installation location

The M-ASK motherboard is fitted under the drive for CD, CD-ROM or DVD.

Construction

The processor board is connected on-end with the M-ASK motherboard. The processor board is fitted with processors and memory chips on both sides. For protection against irradiation and dissipation, the processor board is surrounded with a heat protection shield.

Example: E60

T8403134

Key	Explanation	Key	Explanation
1	Processor for multi-audio system controller	2	Decoder for MP3 files
3	Central computing unit	4	Data memory for M-ASK navigation system
5	Flash memory	6	Timer function for display control
7	Processor for M-ASK user interface	8	Working memory for M-ASK navigation system
9	Processor for M-ASK Gateway
