

USB Audio Interface

Approved and Compatible Apple iPod Devices

Device: Apple iPod

The tests were carried out along with the provided adapter cable for Apple iPod

The software version of the iPod can be detected through selection of the menu “Settings\About” in the Main Menu.

How to detect the software version of an iPod is also available online: <http://docs.info.apple.com/article.html?artnum=60984>

Apple		Model	Software Version	Storage Size	Date of Test	Explanatory Notes

This list is provided for reference only. The devices listed here have passed compatibility tests as of the date of testing and meet or exceed minimum standards established by BMW. The list is not a warranty for device performance or functionality. BMW makes no guarantees or warranties as to the performance of each device while connected to your BMW via the USB Audio Interface. Furthermore, software releases by BMW, the device supplier (e.g. Apple through iTunes) dated after testing might alter compatibility results. While many different MP3 and USB devices are offered, not all of these devices support the necessary profiles to work with your BMW.
