

# Slalom Test Results

Motor Trend Magazine: July 1990 to August of 2000

## The Results are In!

Maximum Motorsports, the leader in quality Mustang suspension components, has created a suspension kit which will enable your Mustang to out-handle the finest cars in the world.

## The Numbers Don't Lie!

The fourth fastest slalom time ever recorded by the editors of *Motor Trend* magazine was set by a 1990 LX. This astounding feat was accomplished by a well-worn Mustang with 180,000 miles on

its stock engine. The key to success was the Maximum Motorsports' suspension kit. The test results, as well as a detailed description of the kit, were published in the December 1998 issue of *5.0 Mustang*.

## The Kit!

The Maximum Motorsports' suspension kit tested was the Road & Track Box, which included the following MM parts: Strut Tower Brace, 4-point K-member brace, Full Length Subframe

Connectors, Caster/Camber plates, Panhard Bar, Rear Lower Control Arms, and Aluminum Steering Rack Bushings. Also included in the box: Bilstein struts and shocks, H&R Race springs, Flaming River solid steering shaft, polyurethane front and rear spring isolators, swaybar bushings and end links, and front control arm bushings.
