

Maintenance

The BMW Maintenance System

The BMW Maintenance System is designed to ensure that your vehicle will continue to furnish consistent reliability combined with optimal safety. The service schedule also includes operations related to the vehicle's comfort and convenience features, such as replacement of the filters for the inside air. The ultimate objective is to ensure economical maintenance by providing the ideal service for your vehicle.

Should the day come when you decide to sell your BMW, you will find that a complete dealer service history is an asset of inestimable value.

CBS Condition Based Service

CBS is a more advanced version of the Service Interval Display. Sensors combine with highly-specialized algorithms to supply service information that reflects your vehicle's actual operating conditions more precisely than ever before.

The system now provides individual displays of the times or distances remaining until the deadlines for specific service operations as well as legally prescribed inspections:

- ▷ Engine oil
- ▷ Brakes: separate for front and rear
- ▷ Brake fluid
- ▷ Spark plugs

- ▷ Vehicle check
- ▷ Depending on national regulations: legally prescribed inspections.

CBS monitors both current and upcoming service requirements. Your vehicle stores this information continuously in the ignition key while the vehicle is being driven. You should therefore hand over to the BMW Service Advisor the key you last used to drive when you take your vehicle for service. After accessing the data stored in the vehicle key, your BMW Service Advisor is able to suggest precisely the right array of service procedures for your own individual vehicle.

By letting you define a service and maintenance regimen that reflects your own individual requirements, Condition Based Service builds the basis for trouble-free driving.

You can find more detailed information on the service requirement display on page 66.

 Make sure the date in the Control Center is always set correctly, refer to page 75, as otherwise the effectiveness of Condition Based Service CBS is not ensured. ◀

Service and Warranty Information Booklet for US models and Warranty and Service Guide Booklet for Canadian models

Please consult your Service and Warranty Information Booklet for US models and Warranty and Service Guide Booklet for Canadian models for additional information on service requirements.

 Have service and repair operations performed at your BMW center. Take the time to ensure that these service procedures are confirmed by entries in your vehicle's Service and Warranty Information Booklet for US models and Warranty and Service Guide Booklet for Cana-
