Warranty Administrators

Subject: IPOD Retrofit not possible with Progman V23.2 and higher

Affected Vehicles: E60, E61, E63, E64

Due to a software error, the IPOD retrofit on the affected vehicles will not work with Progman V23.2 and higher. We are currently working on a Jet-stream update to correct this issue.

For Heated cases after Shop Foreman or Service Manager approval: Please submit a PuMA case to the Body Electrical Group for a possible work-around

Thank you for your continued support.
