

2. where does these connect to ?

"Extra wiring harness"

this probably goes here and the whole thing is grounded somewhere to the car (?)

I think this goes to the ECU wiring.

1. where do these go ?

Each ICE has 2 pairs of black/red.  
One pair you use with the appropriate E60 plug - the other you tie down and not use OR use the second pair to tap for example the mirrors (fade function)  
please confirm Umnitza!!!
