Product Information Sheet

Audio Video Router (AVR)

Product

A central control interface that allows playback of iPod video (authentication chip fitted), routing of video signals to different zones in the vehicle and access for other accessories to the factory fitted screen eg reversing camera.
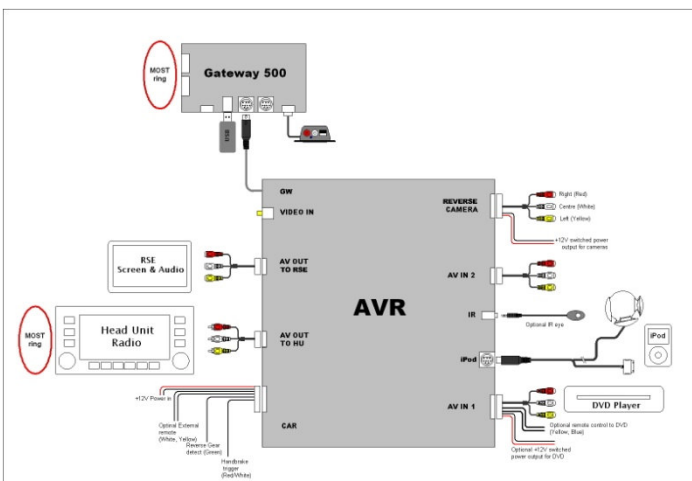

Compatibility

AVR is an accessory to GW500 and is currently compatible to PCM 2 (2.0 &2.1) where fitted in Porsche Cayenne and CCC Professional SatNav in BMW.

Connectivity

AVR connects into the GW500 via the nine pin DIN (where the iPod dock cable normally connects. All other sources then connect into the AVR (4 inputs) Camera, Aux AV, iPod, DVD. There are two outputs, one to the main screen and one to RSE.

Hand brake, reverse gear, NTSC & PAL configuration and TV in Motion are triggered via the CAN BUS

PCM2   AVRG5P1
BMW   AVRG5B1
